

Roshan Mallick

B.Tech Computer Science & Engineering — Techno India University

Kolkata, West Bengal, India roshanmallick2025@gmail.com | [portfolio](#) | [github](#) | [linkedin](#)

SUMMARY

Computer Science student with experience in research, data organization, and software development. Collects and structures information from multiple sources. Uses AI tools, Google Workspace, and Microsoft Office for research and documentation. Applies analytical and problem-solving skills to technical projects.

EDUCATION

B.Tech Computer Science & Engineering

Techno India University, West Bengal

2025 – 2029 (Expected)

- Second semester. Coursework: Data Structures, Algorithms, C Programming, Mathematics.

SKILLS

Research and Data: Information gathering, market research, data analysis, report writing, documentation, data organization

AI and Office Tools: ChatGPT, Gemini, Claude, Microsoft Excel, Microsoft PowerPoint, Google Sheets, Google Docs, Notion

Technical: C, JavaScript, HTML, CSS, Git, GitHub, Linux, Supabase, Vercel

Soft Skills: Analytical thinking, attention to detail, problem solving, time management, communication

RESEARCH EXPERIENCE

Independent Research — AI and Emerging Technologies

- Researched large language models, retrieval-augmented generation, and startup tools. Compared multiple AI models and documented findings.
- Structured technical documentation and workflows using AI tools to improve research efficiency.
- Collected and validated information from multiple sources. Organized findings into structured reports.

PROJECTS

Portfolio Website roshan-mallick.github.io

- Personal portfolio site built with HTML and CSS. Hosted on GitHub Pages with SEO optimization and structured data.

QuickCheck quickcheck-web.vercel.app

- SaaS platform for engineering teams to manage deployment checklists and incident runbooks. Built with HTML, CSS, JavaScript, Supabase, and Vercel.

RentDB github.com/Roshan-Mallick/RentDB

- CLI rent management system in C with CSV export, CRUD operations, and Google Drive auto-sync. Replaced manual Excel workflow with automated data management.

HashVault github.com/Roshan-Mallick/hashvault

- 256-bit password hashing tool in C using bitwise XOR and prime seeding. Zero external dependencies. Includes avalanche tester and authentication logic.
